

STATISTICAL YEARBOOK 2005

**AMERICAN SAMOA STATISTICAL YEARBOOK
2005**

Produced by: The Statistics Division, Department of Commerce - 2006

Section One

POPULATION

This section presents statistics on growth, geographic distribution and general characteristics of the local population.

The American Samoa 2000 census recorded a total population of 57,291. This represents an increase of 10,518 persons, 22 percent since the last count of 46,773 in 1990. The 2000 census reflected a much lower annual growth rate of 2.0 percent compared to the 3.7 percent between 1980 and 1990.

The American Samoa population is very young. The median age remained at about 21 years; demanding much needed services for early childhood education, health and medical, family advocacy, and employment opportunities. The gender ratio recorded at 104 males for every 100 females.

People moved to other places because of economic reasons, availability of land resources and socio/political stability. Internal movement from Manu'a District to both Eastern and Western Districts in Tutuila continued for many years. On the island of Tutuila, the population shifted from East to West in the past two decades. Western District had 32,435 people, while Eastern District had 23,441 people.

The average number of persons per square kilometers is 286, according to the census count of 2000. Given the ruggedness and steep mountainous landscaping of the main island, the population density could be a lot higher than 286.

Mid-year population estimates are calculated using the Balancing Equation Method. For 2005, the resident population was estimated at 65,500. While both births and deaths statistics are considered fairly complete, the migration component used in the mid-year estimate is an estimate based on the 1990-2000 intercensal residual migration and some indicators of net arrival/departure statistics from Immigration records. The local population is projected to reach about 80,000 in 2010.

While the proportion of the American Samoa born population remained above 50 percent, the trend of foreign-born increased from less than 20 percent in 1960 to over 40 percent in the recent census. The majority of the foreign-born were from neighboring Samoa with over 30 percent followed by the US born with 5 percent. The resident population remained ethnically Samoan with 90 percent and with over 20,000 not a citizen, nor a national of the United States.

A full set of detailed demographic, social, economic and housing data on the American Samoa Census 2000 down to the block level geography can be found on the US Census Website www.census.gov/americanfactfinder/dataset/AmericanSamoaCensus2000

Section Two

VITAL AND HEALTH STATISTICS

This section presents data on births, deaths, life expectancy, marriages, diseases, and patient visits and hospital discharges.

Mid-year population estimates between 1991 and 1999 were adjusted due to the low count from the 2000 census. Consequently, rates and ratios have also been adjusted because of the abovementioned reason.

The American Samoa Crude Birth Rate has dropped from 30 per 1,000 persons in 2000, to about 26 in 2005. Females under 20 years old accounted for about 5.9 percent of mothers who gave birth. Mothers aged 20 to 29 accounted for another 54 percent of total live births. The American Samoa Crude Death Rate remained at 4 per 1,000 persons throughout the years. Infant mortality rate (death under one year of age) dropped to 7 per 1,000 live births compared to 15.2 per 1,000 live births in 2004. Population natural growth is defined as total births minus deaths. Assuming both vital registration systems are complete, the natural growth of the resident population in 2005 is at 1,440. In the past five years, a 1,400 people is added to the resident population every year because of natural growth.

Heart disease remained the leading cause of death in the territory followed by Malignant Neoplasm. Outpatient visit by clinic have dropped from about 180,000 visits in 2001 to 140,000 in 2004, and then went up again to 160,000 in 2005. Hospital discharge data and Notifiable Diseases were not available for current years.

Marriages recorded an all time low of only 202 in 2005 compared to an average of about 290 in the past three years. Life expectancy at birth for males is at 68.5 years versus 76.2 years for females.

Section Three

EDUCATION

This section presents statistical information on school enrollment, education achievement, and institutions.

Based on the 2000 Census, about 17 percent of children ages 16-19 years are high school dropouts. The number of children has increased by 24 percent from 20,581 in 1990 to 25,538 in 2000.

Total school enrollment continues to climb in the five-year series despite a decline in the number of institutions. Total enrollment fell in 2001 by 1,050 students, or 5% annually. However, enrollment increased in 2002 by 1,828 students, or 10% annually, and continues to climb by 272 students in 2003, or by 1.3% annually. Elementary school enrollment (those ages 6 to 13) totaled over 13,000. Apart from the college enrollment, public (government) schools accounted for 77 percent of total enrollment. Private school enrollment at the K-Program through high school level continued to drop, while enrollment in Pre-school level continues to climb in the series. The number of teachers in the classroom also continues to increase in the series, with the most notable increase in secondary education by 52 teachers in 2003.

Enrollment at the American Samoa Community College continues to increase; with the majority being American Samoa females ages 15 to 25. Students with full time status dropped in 2004 by 13 students, while students with part time students increased by 71 students. There was a notable increase of full time students in 2003 by 137 students, while part time students only increased by 3 students from the previous year. Enrollment in the Liberal Arts program dropped by 15 students, or 2.6% annually, in 2004. Degrees awarded have fluctuated in the past five years, with a notable drop in 2004 of 66 degrees.

Section Four

LAW ENFORCEMENT

This section contains statistical data on crime, traffic, accidents, firearm registration, correctional facility population, fire, and court activities.

Offenses in the past five years reported by the Department of Public Safety have dropped from 2,500 in 2001 to about 1,800 in 2005. This downward trend is due mainly to significant decline in Assault, Burglary, Disorderly Conduct, and Property Damage/Vandalism.

Of the Part one offenses, Burglary remained the number one complaint from the local community, followed by Assault and Larceny. Of the Part Two Offenses, Disorderly conduct still rated the highest although it has reduced by about 50 percent from last year. DUI offenses followed second at about 200 cases reported. Social disorder is on the rise. Narcotics have gone up by 50 percent in the past five years while Family disorder (Family and Children) has reached double digit. Sex offenses also increased in the five-year period.

Juvenile Offenses continued to drop in the past five years. Assault, Burglary and Larceny were the highest offenses reported in Part One Juvenile Offenses. Disorderly Conduct and Runaways were the most common complaints of Part Two Juvenile Offenses.

A total of 780 traffic accidents were reported by DPS in 2005; a drop of about 17 percent since FY 2004. A total of 111 persons were injured with 4 fatalities. Firearm registration has gone up by 60 percent. Inmate population at the Correctional Facility reported a year-end 2005 count of 222 compared to a 174 count in 2004. About 90 percent of inmates were male and likewise 95 percent were Native Hawaiians or Other Pacific Islands (presumably Samoan) as these racial/ethnic categories were federally standard reporting. No data on Fire was reported for FY-2005.

Over 500 cases were filed at the High Court, while about 3,800 were pending from the previous year. A total of 369 cases were disposed of in 2005. Criminal cases is ranked the highest followed by Civil actions and Divorced. Land and Matai Title cases are on the rise.

CLIMATE

American Samoa has a tropical maritime climate with abundant rain and warm, humid days and nights. Average temperature in 2005 was recorded at 82.6 degrees Fahrenheit. Average temperature throughout the past five years remained at 82.6 degrees. A total of 150 inches of rainfall was also recorded for 2005. The month of December recorded the most rain with about 25 inches. The lowest was recorded for the month of July with only 5 inches.

Usually, the dry months were June through September and the wet months were November through May. Less rainfall was recorded in 2005 during the months of April, July, September and October. Compared to 2004, only 95.8 inches of total rainfall was recorded with lowest recorded from April to September. Typically, heavy rain and showers, even long rainy period can occur frequently in any month.

Section Six

**LAND USE/REGISTRATION, HOUSING CHARACTERISTICS, AND
BUILDING PERMITS**

This section presents statistics on land use, land ownership registration and tenure, housing characteristics, building permits, type and value of construction activities.

Total land area in American Samoa consists of 48,767 acres and about two thirds of the land is steeply sloping and virtually inaccessible. In 2005 land registration slightly went up by only 20 acres. Approximately 7,700 acres have been registered in five major categories of Land Ownership. Communal or native type of ownership still holds with 26.7 percent, Individually – owned Land at 25.3 percent, 21.5 percent used by Government, 13.3 percent for Freehold, and 13.2 percent for Church use.

Per 2000 census, American Samoa registered 10,052 housing units. Of the 10,052 units, 93.0 percent were occupied and 7.0 percent (703) were vacant units. Of the 9,349 occupied housing units, 77.2 percent were owner – occupied and 22.8 percent were renter occupied. Tafuna village in the Tualauta county had the highest number of occupants per room on both owner – occupied and renter – occupied units.

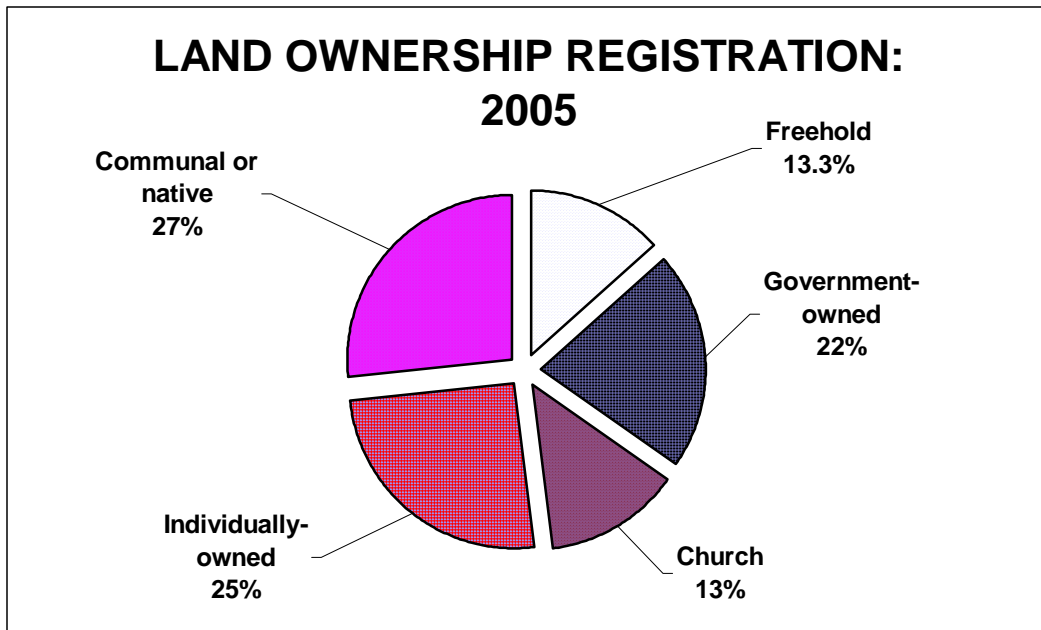

Approximately 60 percent of the 10,052 total registered housing units are located in both Maoputasi and Tualauta counties. Furthermore, these counties absorbed most of the growth; a combined 71.6 percent of the rental market (areas where most of the rental units were found.) Housing units are characterized as single detached units, attached units, 2 houses, 3 or more houses, 2 units, 3 or more units, etc. This is unique to American Samoa where about 9 percent of households live in two or more houses. Living in apartment housing is on the rise as 6 percent of households live in buildings with 2 or more units. Those living in single detached houses have dropped from about 90 percent in 1990 to 78 percent in 2000. The construction boom peaked in the 1990 – 1994 period, which accounted for almost 3,000 newly built structures.

Over 800 building permits were issued in 2005. However, less than 200 were for new structures with an estimated value of \$14.5 million. The rest were repair, extension and/or alteration. Historically the trend of new structures as an indication of investment has been steady in the past ten years; except in 2004 where new structures were much higher due to hurricane Heta.

1994	470	187	283	14,425
1993	338	170	168	11,716
1992	721	580	141	25,303
1991	615	307	308	17,023
1990	1,280	588	692	14,520
1989	351	244	107	12,120
1988	354	247	107	10,071
1987	396	238	158	10,454
1986	347	172	175	7,384
1985	434	187	247	11,600

NOTE: Estimated value of construction for 1980 to 1988 was done by the Research and Statistics Division, EDPO, based on permit fees assessment.

Estimated value of construction from 1989 to 1997 were extracted from monthly reports submitted by the Building Branch Division, Department of Public Works. Estimated value for 1990 did not include value for all FEMA houses built after Ofa; although, the number of FEMA permits issued were included.

Thus number of permits in 1990 increased by 265 percent due to Hurricane Ofa.

Estimated value in 1992 included a \$5 million single major project at the Industrial Park Value of all government projects are excluded from estimated value of Construction

Section 7

INTERNATIONAL ARRIVALS AND DEPARTURES

This section presents statistics on arrivals and departures by purpose and citizenship of travelers. There were no data available for 2002, 2003, and 2004.

Close to 130,000 travelers arrived, passed through or left the territory in 2005. Arrivals have dropped to a little over 64,200 in 2005 compared to an average of 90,000 between 1998-2001. Most arrivals were mainly from the United States followed by Samoa and American Samoans returning from travel abroad. About 51.1 percent of arrivals were returning residents followed by visit friends/relatives with 20.4 percent. Tourists accounted for 10.9 percent of travel. Departure in 2005 amounted to almost 65,000. Most departures were Samoa citizens leaving followed by United States citizens and American Samoans traveling abroad. Resident travelers regardless of citizenship amounted to 54.1 percent of outbound travel, followed by visit friends/relatives with 16.5 percent and tourism with 11.5 percent.

Tourist arrivals in 2005 had improved: averaged at about 6,500 between 1998 and 2001, it has now reached over 7,000 in 2005. Our tourism market is made up of the United States with 55.6 percent, New Zealand with 32.2 percent and Australia with 8.3 percent. Like tourists, business travelers arriving were mostly from the United States (64.9 percent) followed by New Zealand with 20 percent, Samoa with 4.8 percent and Australia with 4.0%. Net loss of local residents amounted to 2,274 (arrivals of resident travelers minus departures.) The net loss is due to American Samoan born residents moving abroad (net -2,484) followed by Samoa citizens net loss of 337 (an indication of returned migration.)

One sector that is worth noting and definitely on a comeback trail is the cruise ship industry. Endless efforts in data collection continued, and fortunately, we have been able to get arrivals for the following period.

CRUISE SHIP ARRIVALS						
	2001	2002	2003	2004	2005	Total
Passengers	4,914	2,791	8,229	3,538	6,050	25,522
Yearly chg.		(2,123)	5,438	(4,691)	2,512	

There was significantly higher number of cruise ship arrivals in 2003. Unfortunately, arrivals declined almost 60 percent in 2004 for the most part, due to Hurricane Heta in the beginning of the year. Projected arrivals for 2005 will almost double yielding almost 90 percent increase. Overall, experts are betting that this would be the beginning of a long overdue rebound for the cruise ship sector, thus fueling an economic boost to our local economy.

Section Eight

Election

This section presents data on voter registration and election results by voting districts, village, age and gender in American Samoa.

A total of 16,102 people registered to vote in the November 2, 2004 election. However, only 12,079 (75%) of the people cast their vote on Election Day. Tualauta (District #15) had the most votes cast with 1,929 (16%). Ituau (District #2) followed with 1,478 (12.2%) votes cast. Swains Island had the least votes cast with only 4.

In the past three elections, about 70-plus percent of the people who registered to vote voted in the general election. Manu'a (District #2) had the highest percent of votes cast with 80.9 percent in the 2004 election. It also had the highest percent of votes cast in the 2002 and 2000 elections.

Over 47 percent of registered voters were between the ages of 18 and 34. About 9.6 percent were for the 65 and over age group.

A total of 7,686 (48%) males registered to vote while 8,416 (52%) females registered to vote in the 2004 election. More females register to vote than males in all the elections starting from the 1984 election to the 2004 election.

Section Nine

GOVERNMENT FINANCE

This section presents statistics relating to the American Samoa Government revenue and expenditure.

In 2002, American Samoa Government adopted GASB Statement No. 34. It is a reporting approach established by Governmental Accounting Standards Board to enforce new requirements and a new reporting model for the annual financial reports of state and local governments. Its primary purpose is to develop annual financial reports for easier interpretations and understanding of government funding. GASB No. 34 has technically changed the format of the financial statements in contrast to the previous years. This had made financial data incompatible for analytical purposes. Therefore, it is difficult to evaluate the financial trends from previous years to 2002.

In FY 2004, the American Samoa Government collected revenue of \$188.9 million, while total expenditure amounted to \$192.4 million, resulting in a current deficit of \$3.5 million. In FY 2003, the government collected \$197.9 million and with total expenditure of \$170.7 million yielded a FY 2003 surplus of \$27.2 million. Like the FY 2003 surplus, the fiscal year-end surpluses 2001 (\$1.8 million) and 2002 (\$31.0 million) were attributed to funds received from insurance claims/proceeds and tobacco settlement. Despite the surplus trends and favorable financial conditions of the government since 2001, ASG accumulated a cumulative deficit of \$5.9 million at the end of fiscal year 2004. Historically and since 1992, ASG has accumulated a financial deficit that reached \$39 million in 1997 and somewhat dropped to \$22 million by the end of fiscal year 2001. End of FY 2002 for the first time in 10 years, government finances were in the surplus. Now after 2004, the government again is in the red.

Government spent its money on General Government operations (32.2 percent or \$62 million) followed by Education/Culture (27.9 percent or \$53.6 million) and another \$37.1 million (19 percent) on Health/Recreation.

Section Ten

LABOR FORCE, EMPLOYMENT AND EARNINGS

This section presents statistics on labor force, wages, income, and poverty.

Total employment in 2005 was estimated at 17,344, a slight drop from the 2004 figure of 17,502. The estimate includes 6,064 employment of government including authorities, 4,546 of cannery employment, and 6,700 private sector employees.

In the past five years about 500 new employees were added to the General Government workforce (in fact over 300 additional jobs were added in 2005.) Over 100 contract and 200 career service employees were accounted for the 2005 increase. Industry and Occupation data from the 2000 census by districts, counties and villages presented employment and economic activities geographically. Census 2000 showed that close to 800 families in the territory had no worker at all.

Local minimum wages for various industries in American Samoa have stayed stagnant since 2002 except for about 5 industry classifications. The highest increase of the five industries was in Tours and Travel with an additional 8 cents hike. Hotel industry and Government followed second with an increase of 7 cents each. Shipping/Transportation-Stevedoring, and maritime shipping agency remained the highest minimum wage of \$4.09. Fish unloading followed with \$3.92 while Fish canning and processing remained at \$3.26 since 2001.

Median household income in 2000 was \$18,219. The lowest median household income was recorded in the Manu'a District with only \$14,338 (only 79 percent of territorial median.) The worse is the county of Olosega with only \$10,500 median household income (a little over 50 percent of territorial median.) Close to \$250 million worth of income from all sources were received by all residents of the territory in 2000. Thus, the per capita income was \$4,357.

About 61 percent of all persons or 58 percent of families were below the national poverty level according to the 2000 census. One (1) out of every ten (10) families is a female householder with children. Of the 3,889 grandparents reported to have lived with their grandchildren, 71 percent of them were responsible for childcare.

Section 11

CONSUMER PRICES AND EXPENDITURES

This section presents data on the local Consumer Price Index (CPI), average prices of selected commodities normally purchased by households, and annual household expenditure.

The American Samoa Consumer Price Index is designed to measure price changes of commodities and services normally purchased by the local community. Like the U.S. CPI, it is based on the concept of representative “market basket”; a sample of goods and services the consumer purchased. The local CPI began in 1974. Weight distributions (representing relative value of commodity purchases to total expenditure) are aggregated to obtain CPI Group Indices and Sub-Group Indices. Two major revisions were done on the CPI. The first revision was done in 1982 and the second one in 1997. These revisions were necessary to reflect consumer preferences and market changes.

The CPI for the last quarters of 2003 and 2004 registered at 114.4 and 124.5 index points respectively. This is an increase of 10.1 index points between the two years. The average inflation rate in 2003 and 2004 were 4.2 percent and 7.1 percent respectively. This level of high inflation was last experienced around 1991 and 1992 after major hurricane disasters. This correlation is again seen here as more and more federal aids and additional income received by the local community after hurricane Heta. Over \$30 million of cash assistance was received locally.

Household expenditures were last collected in 1995. The Household Income & Expenditures Survey (HIES) of 1995 reported that the annual household spending in the territory amounted to \$204 million. Food and housing accounted for over 50 percent of household spending. Special expenditures such as church donations, wedding, matai title investitures, funerals, gifts, and family *fa'alavelave* accounted for 21 percent of household spending. It is worthy to note that household expenditures will be collected in the 2005 Household Income & Expenditures Survey. This data will be published as soon as it is available.

Section Twelve

COMMUNICATION AND TRANSPORTATION

This section presents statistics on communication services, registration of motor vehicles, drivers' licenses and permits in force, vessel and cargo movement, air-traffic and aircraft operation.

The number of telephones installed in 2005 amounted to 10,663; an increase of about 300 more phone instruments from the previous year. However, the 2005 count remained below the fourteen thousand phones operated in 2002. The decline in telephones is primarily due to the rise in the use of cellular phone instruments. The number of overseas called remained closer to almost 4 million completed calls, however, the number of revenue minutes dropped by over 20 percent. Telegram service is no longer in use while the number of internet-service subscribers reached almost 2,000.

The total number of registered motor vehicle continued to increase in 2005. Close to 80 vehicles were added since the 2004 registration. Despite an increase in number of buses registered, commercially operated vehicles dropped because of a sharp decline in the number of taxis registered. Therefore, the real increase in vehicle registration is attributed to the increase number of privately owned vehicles (almost 300 additional registration.)

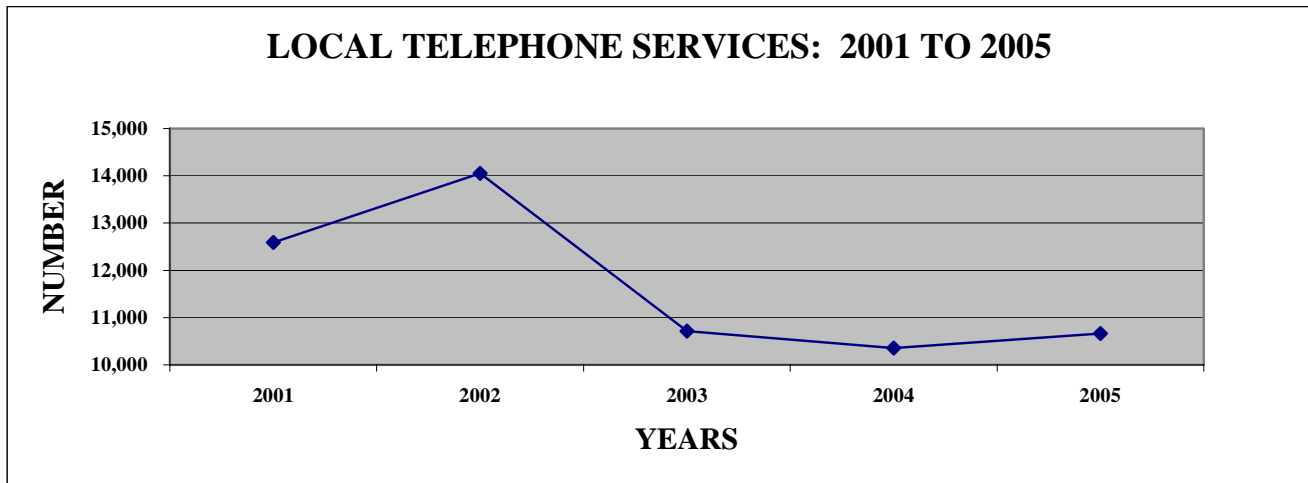

A total of 890 vessels entered the territory in 2005 versus 908 leaving. Tonnage of cargo brought into the territory amounted to over 400,000 in 2005 and over 500,000 tons in 2004. Of the 890 vessels entering in 2005, 6 cruise ships, 158 freighters, 4 military ship, and 513 were fishing boats.

A total of 4,044 flights were recorded at the Pago Pago International Airport carrying 72,688 passengers in 2005. Likewise, 4,044 flights were leaving; taking 78,009 passengers (a net loss of about 7,300.) Net travel between Hawaii and American Samoa in 2005 amounted to a negative 920. Similarly in 2004, net travel on the same route was 1,406. The big difference in the two numbers was due mainly to flights availability. In 2004, an average of 27 flights per month was recorded compared to an average of 10 flights per month in 2005. A total of 120 flights were arriving from and leaving for Honolulu in 2005 compared to 324 in and out flights in 2004 (including Aloha Airline flights). The number of passengers arriving and leaving remained at or below 30,000 in the two years.

Section Thirteen

AGRICULTURE AND FISHING

This section presents statistics on agricultural land, farms, and farm tenures, field crops and livestock, and local fishing.

The 2003 agricultural census (conducted in 2004) was the second census under the new arrangement with the USDA-NASS. Traditionally the agricultural census was conducted as a supplement to the Decennial Census of Population and Housing. A total of 7,094 farms were covered in 2003. Approximately 40 percent of total land area (20,000 acres) is under farming which included cropland, pastureland and other farm uses (including woodland.) With this new census taking arrangement the number of farms covered have remained at six and seven thousands in the census of 1999 and 2003 respectively.

The majority of farms were cropland farms covering over 14,000 acres of land. Most farms were about 1 to 2 acres (38 percent of all farms). Another 26 percent of farms were 1 or less acreage in size. Similar distributions of average farm sizes were seen in the both the 1999 and 1990 censuses. All agricultural and farming (whether for commercial resale or home consumption) was valued at \$58.2 million in 2003: a significant drop from the 1999 agricultural worth of \$73.8 million. The drop in value of agriculture/farming was probably due to flooding which affected American Samoa in 2003, and perhaps due to respondent recall concerns where Hurricane Heta devastated the islands in January 2004.

Local agricultural produce (fruits, vegetables, coconuts, bananas, and root crops) sold at the Fagatogo Market has improved since 2001 with fruits, taro, breadfruits with increased productions. Vegetable production is also improving although it is only half the production sold in 2001.

Local fishing activities in 2005 recorded 141,000 pounds of fish caught, utilizing 53 boats and 159 fishermen. Catch volume regardless of fishing method has dropped from almost a million in 2002 to 141,000 in 2005. Longlining brought in the highest catch with over 75 percent of total.

Section Fourteen

COMMERCE AND TRADE

This section presents data on trade activities, government purchases, and business registration.

The American Samoa Trade Balance in fiscal year 2005 recorded a deficit of about \$179 million. This is due primarily to total value of imports estimated at \$553 million compared to total exports valued at \$374 million. Imports consist of Government purchases from the US and other countries plus the estimated value of raw fish for processing plus the value of commercial merchandizing for resale as reported by the local Customs Division. The exclusion of value of merchandizes brought in by the Post Exchange suggests a much larger volume and value of all imports entering American Samoa. On the other hand the value of export in 2005 (made up primarily of canned tuna and by-products amounted to only \$374: a sharp decline from the 2004 value of \$446 million.

The number of canned tuna cases reported by Customs Division continued to drop from an all time high of about 34 million cases in 2001 to 21 million cases in 2005. Although a case is a non-standard quantity measure, it provides some measure on unit cost analysis of canned tuna. For instance, the unit cost for a case of canned tuna ranges from about \$17 to \$19 in the last four years. Historically, the analysis of unit cost of canned cases also suggested a decline in unit values from \$25 in the eighties, \$21 in the nineties, and now at about \$17 dollars.

Total imports brought in for commercial use and went through Customs Regulation was valued at \$274.2 million in 2005 and \$308.8 million in 2004: an 11.2 percent drop. American Samoa's five leading trade partners still remain the United States with 45 percent, Australia with 10 percent, Singapore with 25 percent, New Zealand with 7 percent and Korea with 6 percent.

Business License Registration reached almost 3,000 in 2005: a slight increase from license registration in 2004.

Section Fifteen

Electricity and Water

This section presents statistics on electricity production, consumption, sales, number of electric meters and water.

Electricity production continued to climb from 171 million kwhs produced in 2001 to 189 million kwhs in 2005. Likewise sales of electricity in the same period have gone up from 163 million kwhs to 182 million kwhs, and with improved line loss percentage now down to 7.9 percent. With over 12 million gallons of fuel consumed in the production of electricity, fuel efficiency (kwh per gallon) is slowly dropping from as high as 15.62 in 2002 to 15.14 in 2005. The average cost of a gallon of fuel in 2005 was \$1.858 compared to \$1.074 in 2001 (an increase of over 80 cents in the five year period.) Up to the end of 2005, fuel cost was at 2.182 per gallon. With the increase in fuel cost the fuel surcharge went up also from about 9 cents in 2001 to 14 cents in 2005. Up to the end of 2005 the fuel surcharge was at about 17 cents.

There were 11,307 electrical meters installed in the territory. Of those, about 9,900 were residential usage (this is close to the 10,000 estimates of housing units in American Samoa from the 2005 household survey.) Another 900 of electric customers were commercial usage while government amounted to about 390 meters. Sales were about equally divided among the four classes of customers with Residential and Commercial Users using 48 million kwhs each, followed by Large Power Users (only 6 of them) consuming another 36 million kwhs. Government and ASPA used up about 34 million kwhs in 2005.

In 2005, total gallons of water sold amounted to 2,241 millions and costing Utility Company about \$1.5 million in production.
