

## ACKNOWLEDGMENTS

The authors wish to thank Rhonda Loh, Jon Makaike and Tim Tunison (National Park Service, Hawai'i Volcanoes National Park) for logistical and technical support, Kamakani Dancil (Forest Solutions) and Kim Tavares (Big Island Invasive Species Committee) for assistance with field mapping and David Okita (Volcano Helicopters) for assistance with aerial surveys. We thank Linda W. Pratt (USGS, Biological Sciences Division) for insightful review of this manuscript, and Andrika Kuhle and Karin Schlappa (NPS, I&M Program) for assistance with editing. We thank David Duffy, Unit Leader: the Pacific Cooperative Studies Unit (PCSU). This project was carried out under a cooperative agreement with the Pacific Cooperative Studies Unit, University of Hawai'i at Mānoa.

### Author Note:

A population of five plants was observed at Hawaiian Ocean View Estates in early 2005. One plant was apparently cultivated, and four plants were observed and removed in a nearby `ōhi`a woodland. Additional surveys and notification of the landowner are recommended.
